WORK EXPERIENCE

Fullstack Web Developer | creArt-ONG (2024-Present)

- Improved website usability and functionality by migrating from WordPress (CMS) to a custom solution using the MERN stack.
- Reduced site loading times.
- Created a custom design tailored to the specified requirements.

Fullstack Web Developer | Freelance (2021 - Present)

- Created and designed a website for a motorcycle rental company using the MERN stack.
- Customized a psychologist's website by migrating it from a CMS.
- Developed E-commerce websites with WordPress, utilizing templates and plugins.
- Built various websites using HTML, CSS, JavaScript, PHP, and the MERN stack for clients such as a solo musician, an electrical wiring company, a leisure boat service, a user rating platform, and more.
- Created and consumed APIs, developed CRUD functionalities, and connected to both SQL and NoSQL databases.
- Personal projects developed with MERN include: "Story-Baby," "Balanced Match Manager," and "What to Eat Today?"

Chief Project Architect | Ideas Designs (2014 - 2020)

- Coordinated architectural projects from design to construction execution.
- Supervised multiple work teams.
- Developed execution plans with established deadlines.
- Adapted and reorganized plans to address unforeseen events and contingencies while adhering to deadlines.
